

Amgrow-Sir Walter Buffalo Lawn

LIME & GYPSUM

“Amgrow-Sir Walter” Granular Lime & Gypsum 10kg

Sweetens acidic soils which helps release nutrients trapped by low pH. Provides essential calcium. Gypsum component helps break up clay soils and improves structure of the soil.

- Buffalo Lawn Granular Lime & Gypsum 10 Kg
- Consists of 50% lime & 50% gypsum in one step application
- Convenient, easy to use granular prills
- Sweetens acid soils which helps release nutrients trapped by low pH
- Provides essential calcium
- Gypsum component helps break up clay soils and improves structure of the soil

Coverage

This bucket will cover 200 square metres of lawn.

Measurement Guide:

1 cupful = approximately 100 grams

Directions:

Before Laying Turf - Work 40 grams per square metre into the soil prior to sowing or planting out.

Established Lawns - Spread 40 grams per square metre evenly every year. Water in well. Apply any time of year. Always water in well, immediately after application.

This product consists of 50% lime and 50% gypsum which is blended then combined in convenient, easy to use granular prills.

Sir Walter Granular Lime & Gypsum is easy to spread, and saves the extra time involved in the application of two separate products.

The lime component sweetens “sour” or acid soils and at the same time provides plants with the essential plant nutrient, calcium.

Analysis

| | |
|-----------------|-------|
| Calcium | 23.3% |
| Sulphur | 7.45% |
| Magnesium | 2.45% |
